CAREER OBJECTIVE

Final-year Computer Science student with hands-on experience in software development, REST API design, debugging, and performance optimization. Skilled in writing clean, maintainable code and applying Agile SDLC principles across full-stack projects. Seeking a **Software Engineer Internship** to contribute to real-world development, testing, and cross-functional collaboration.

EDUCATION

Atria Institute of Technology <i>B.E. Computer Science and Design</i> CGPA: 8.78 / 10.0 (Equivalent $\approx$ 87.8%)	Bengaluru, Karnataka 2023 – 2027
--	-------------------------------------

TECHNICAL SKILLS

- **Languages:** Python, Java, C/C++, JavaScript
- **Frontend:** HTML5, CSS3, React.js (component-based architecture, dynamic routing, state management)
- **Backend:** REST API Development, Backend Integration, API Design, Request/Response Handling
- **Databases:** MySQL, SQL — querying, schema design, debugging data inconsistencies; exposure to NoSQL (MongoDB)
- **ML:** Scikit-learn, TensorFlow, Supervised Learning, Feature Engineering, Model Evaluation
- **Testing:** Unit Testing, pytest, Manual Testing, Test Case Design, Debugging, QA Processes
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), SDLC
- **SDLC & Methodology:** Agile, Scrum, Sprint Planning, Iterative Development, Code Review, Version Control Workflow
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), VS Code, Jupyter Notebook, Figma **OS:** Windows, Linux

PROJECTS

Soil Analysis & Crop Recommendation System	<i>Python, Scikit-learn, Pandas, NumPy</i>	2025
---	--	-------------

- Designed an end-to-end ML pipeline following Agile SDLC — iterative sprints from data ingestion to model deployment.
- Processed 10,000+ dataset samples; debugged data inconsistencies and applied feature engineering and normalization.
- Improved prediction accuracy by **18%** through hyperparameter tuning, cross-validation, and systematic model evaluation.
- Wrote unit tests using pytest to validate preprocessing and model outputs; documented pipeline architecture on GitHub with clean, modular code.

Smart Waste Segregation Dashboard	<i>Python, React.js, Machine Learning, REST APIs</i>	2025
--	--	-------------

- Built a full-stack AI dashboard across React.js frontend and Python REST API backend using iterative Agile development cycles.
- Developed, tested, and debugged backend REST APIs by analyzing request/response logs and resolving failure edge cases.
- Reduced API latency by **35%** through performance profiling, optimized data processing, and targeted code refactoring.
- Designed modular, reusable UI components with responsive layouts; automated deployment using GitHub Actions CI/CD pipeline.

Bangalore Escape — Travel Guide Web App	<i>React.js, JavaScript, HTML5, CSS3</i>	2023
--	--	-------------

- Developed a responsive travel app using React.js with dynamic routing and reusable component architecture.
- Identified and fixed UI rendering bugs and state management inconsistencies, improving cross-browser compatibility.
- Integrated map-based navigation and location filtering; optimized frontend performance for improved page load speed.

ACHIEVEMENTS

- **Competitive Programming:** Solved **100+ DSA problems** on LeetCode — strong analytical and problem-solving skills.
- **NCC Leadership:** Earned NCC ‘A’ and ‘B’ Certificates — teamwork, discipline, and ownership in structured environments.
- **Sports:** Represented Sainik School Nalanda in Central Zone Hockey Championship — secured **2nd Place**.
