ABOUT

Final-year Computer Science and Design student with strong foundations in Java, Data Structures, Algorithms and Software Engineering. Experienced in full-stack development, REST APIs, cloud-native applications and AI-powered systems. Passionate about scalable backend services, AWS technologies and DevOps practices.

EDUCATION

Atria Institute of Technology 2023–2027
Bachelor of Engineering in Computer Science and Design (CGPA: 8.78/10) Bengaluru

EXPERIENCE

AI Virtual Intern Jul 2026–Present
Infosys Springboard Remote

- Developing SmartHire, a production-style AI recruitment platform using React.js, Node.js, Express.js, PostgreSQL and TypeScript.
- Building REST APIs, integrating Google Gemini AI and implementing JWT, Google OAuth and RBAC.
- Using Git, Docker and Agile workflows while testing and optimizing application performance.

TECHNICAL SKILLS

- Languages:** Java, Python, JavaScript, TypeScript, SQL
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Vite
- Backend:** Node.js, Express.js, REST APIs
- Databases:** PostgreSQL, MySQL, MongoDB, Prisma ORM
- Cloud/DevOps:** Docker, Git, GitHub, GitHub Actions, AWS (Basics)
- Core CS:** DSA, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

SmartHire – AI Recruitment Platform 2026

- Engineered a full-stack recruitment platform with dedicated Candidate, Recruiter and Admin portals supporting the complete hiring lifecycle.
- Built scalable REST APIs using Node.js and Express.js with PostgreSQL and Prisma ORM for job management, application tracking and recruiter workflows.
- Integrated Google Gemini AI for resume parsing, ATS scoring, intelligent resume matching, interview question generation and automated candidate evaluation.
- Implemented JWT authentication, Google OAuth, RBAC, Docker-based deployment and modular architecture for secure, maintainable and scalable development.

Smart Waste Segregation Dashboard 2025

- Developed an AI-enabled dashboard for monitoring waste segregation using React.js, Python and REST APIs.
- Designed backend services, role-based access and analytics dashboards to support data visualization and operational monitoring.
- Optimized API performance by 35%, reducing response latency and improving user experience.
- Configured GitHub Actions CI/CD for automated build, testing and deployment workflows.

Soil Analysis & Crop Recommendation 2025

- Built a machine learning application using Python, Scikit-learn, Pandas and NumPy to recommend crops from soil characteristics.
- Preprocessed and analyzed 10,000+ soil records using feature engineering and exploratory data analysis.
- Evaluated multiple ML models and improved prediction accuracy by 18% through hyperparameter tuning and model optimization.
- Developed a simple web interface for real-time crop recommendations from user-provided soil parameters.

ACHIEVEMENTS

- Flipkart GRiD 8.0 – Qualified up to Round 3 (SDE Track).
- Solved 100+ LeetCode coding problems.
- Runner-Up, Central Zone Hockey Championship (Sainik School Nalanda).
- NCC 'A' and 'B' Certificate holder.
