ABOUT

Final-year Computer Science student with strong foundations in software testing, Python, Java, REST APIs, SQL, and Agile development. Experienced in debugging applications, testing REST APIs using Postman, writing unit tests, and working with Git/GitHub workflows. Familiar with AI concepts, CI/CD pipelines, and software testing methodologies including unit, integration, functional, and regression testing. Seeking an AI Test Engineer Internship to contribute to automation testing and quality engineering.

EDUCATION

Atria Institute of Technology

2023 – 2027

Bachelor of Engineering in Computer Science and Design

CGPA: 8.78/10

Bengaluru, Karnataka

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Software Testing: Unit Testing, Integration Testing, Functional Testing, Regression Testing

Automation Tools: Selenium (Learning), Postman, GitHub Actions

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

AI & Machine Learning: Generative AI Fundamentals, Rag,Prompt Engineering, OpenAI API (Learning), Scikit-learn, Pandas, NumPy

Version Control: Git, GitHub

CI/CD: GitHub Actions

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, REST APIs, Agile/Scrum

PROJECTS

Smart Waste Segregation Dashboard

2025

React.js, TypeScript, Python, REST APIs, GitHub Actions

- Developed a full-stack AI application using React.js frontend and Python REST APIs following Agile development practices.
- Tested REST API endpoints using Postman and analyzed request/response logs to identify and resolve functional defects.
- Performed debugging and validation of backend modules, improving API response time by **35%**.
- Implemented GitHub Actions CI/CD pipeline and wrote unit tests to verify application functionality before deployment.

Bangalore Escape – Travel Guide Web App

2023

React.js, JavaScript, HTML5, CSS3

- Developed a responsive web application and verified UI functionality across multiple browsers and screen sizes.
- Identified and fixed rendering defects, navigation issues, and state management bugs through systematic testing and debugging.
- Validated application workflows and optimized user experience by testing edge cases and improving responsiveness.

Soil Analysis & Crop Recommendation System

2025

Python, Scikit-learn, Pandas, NumPy

- Developed an end-to-end machine learning pipeline using Python and validated preprocessing and prediction workflows through unit testing.
- Processed over **10,000+** records while debugging preprocessing issues, improving prediction accuracy by **18%**.
- Documented testing procedures, validation results, and project architecture using GitHub version control.

ACHIEVEMENTS

- Solved **100+** Data Structures and Algorithms problems on LeetCode, demonstrating strong analytical and problem-solving skills.
- Built multiple academic projects involving REST APIs, AI concepts, debugging, testing, and CI/CD workflows.
- Awarded NCC 'A' and 'B' Certificates, demonstrating leadership, teamwork, and discipline.
- Represented Sainik School Nalanda in the Central Zone Hockey Championship and secured **Runner-Up**.
