ABOUT

Final-year Computer Science and Design student passionate about software engineering and AI-assisted development. Experienced with Java, Python, React, REST APIs, Git and modern development workflows. Regularly use Claude, Cursor, ChatGPT and GitHub Copilot with prompt engineering to accelerate development, debugging and documentation. Self-driven learner seeking a Software Engineering Internship.

EDUCATION

Atria Institute of Technology 2023–2027
Bachelor of Engineering in Computer Science and Design
CGPA: 8.78/10 Bengaluru

EXPERIENCE

AI Intern July 2026–Present
Infosys Springboard Remote

- Developing AI-powered applications using Generative AI, Python and REST APIs.
- Using Claude, Cursor, ChatGPT and GitHub Copilot for AI-assisted software development and prompt engineering.
- Working with Git, GitHub and Agile development workflows on real-world projects.
- Automating repetitive engineering tasks and improving development productivity using AI tools.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
AI-Assisted Development: Claude, Cursor, ChatGPT, GitHub Copilot, Prompt Engineering
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, VS Code, Postman
Machine Learning: Scikit-learn, Pandas, NumPy, Generative AI Fundamentals
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Development: Agile, CI/CD (GitHub Actions), Debugging

PROJECTS

Smart Waste Segregation Dashboard 2025
React.js, Python, REST APIs, GitHub Actions

- Built a full-stack AI application using React.js and Python REST APIs.
- Leveraged Claude, Cursor and ChatGPT to accelerate implementation and debugging.
- Reduced backend response time by **35%** through optimization.
- Implemented GitHub Actions CI/CD pipeline and Git workflows.

Bangalore Escape – Travel Guide 2023
React.js, JavaScript

- Developed a responsive travel web application using React.js.
- Improved UI performance by fixing rendering and state management issues.
- Followed Git-based iterative software development practices.

Soil Analysis & Crop Recommendation 2025
Python, Scikit-learn

- Built an end-to-end machine learning application for crop recommendation.
- Processed over **10,000+** records and improved prediction accuracy by **18%**.
- Maintained project documentation and version control using GitHub.

ACHIEVEMENTS

- Qualified Round 1, Round 2 and Round 3 of **Flipkart GRiD 8.0 (Software Development Track)**, a national-level engineering competition.
- Solved **100+** Data Structures and Algorithms problems on LeetCode.
- Built multiple AI-powered and full-stack software projects beyond coursework.
- Hands-on experience using Claude, Cursor, ChatGPT and GitHub Copilot for AI-assisted software engineering.
- Represented Sainik School Nalanda in the Central Zone Hockey Championship and secured **Runner-Up**.
- Awarded NCC 'A' and 'B' Certificates for leadership, teamwork and discipline.
